Research Profile

My research applies econometrics, causal inference, and machine learning to industrial economics and policy evaluation. My current Master's thesis (Blekinge Institute of Technology, 2026) uses econometric methods to assess how innovation clusters and business policies affect Sweden's economic indicators. My first Master's (IT, 2021) developed deep learning-based recommender systems for online business management. I seek a PhD position in Finland applying data-driven policy evaluation and causal inference to economic and business systems.

Education

- **M.Sc. Industrial Economics & Management** – Blekinge Institute of Technology, Sweden (2026)
Thesis: Econometric Evaluation of Innovation Clusters & Business Policy Impacts on Sweden's Economic Indicators
- **M.Sc. Information Technology** – Islamic Azad University, Iran (2021)
Thesis: Deep Learning-based Recommender Systems for Online Business Management
- **B.Sc. Industrial Engineering** – Islamic Azad University, Iran (2006)

Research Experience

- **Researcher & Business Analyst** – Cafeinno, Iran (2025–present)
Market analysis, ML-based customer analytics, churn prediction (reduced churn 15–20% in pilot startups)

- **Researcher & Business Analyst** – IPM, Ireland (2024–2025)
Econometric and statistical analysis of online business performance and policy impacts
- **Business Analyst (Strategy)** – Ludy, Sweden (2024) , Iran (2021–2023)
Strategic goal setting, KPI design, stakeholder communication
- **Project & Planning Manager** – Kargosha, Iran (2017–2021)
Resource planning, material management system (reduced calculation errors 15–20%)

Selected Publications

- Investigating emotional & cultural mapping in urban design (Springer, 2024)
- Agile project management in the age of AI (Project Management Institute blog)
- Improving collaborative filtering recommender systems using deep features (DTJ, 2023)
- Translation: *Urban Ecosystem* by Adler & Tanner (Shafaf Publications)

Technical Skills

- **Languages:** Python (deep learning, recommender systems, analytics), R (statistics/econometrics)
- **Tools:** Power BI, Excel, Git/GitHub, MS Project, Visio, Canvas
- **Methods:** Econometrics, causal inference, regression (linear/logistic/panel), data preprocessing, survey analysis, business model analytics

Awards & Scholarships

- BTH 50% tuition scholarship (Sweden, 2023–2026)
- Participant – GITEX Global 2025 (Dubai)
- Top Five Entrepreneur – Sharif University Festival (Iran)
- Commendation Plaque – Municipality of Tehran

Teaching & Mentoring

- Instructor: Value Engineering (IMI, Iran), Business Model Design (Tarbiat Modares University), Startup Essentials (Farzanegan High School)

Languages

Persian (native), English (B2), Swedish (A1–A2), German (A1–A2)
